All the game issues still exist for so many years and koei never do something, so what can we do?. I really want to recommend this game, but I just can't.

Wetwork is a fun, Hitman-esque, stealth, assassin game. It gives its own spin on the Hitman gameplay formula by adding features such as the ability to jump, go into a first-person perspective, and play as either a male or female assassin.

I enjoyed my time with the game, but in its current early access state, it's pretty rough. With only two currently playable levels, the game offers less than two hours of real playtime for its \$11.49 CAD price tag, which in my opinion is pretty steep. The combat is quite unbalanced, causing a detection by guards to almost always lead to an immediate death and mission failure. Wetwork suffers from infuriatingly long load times of upwards to three minutes and does not allow the player to save any progress so missions must always be restarted from the beginning.

I think that Wetwork has a lot of potential, but in its current state I cannot recommend that you buy it. Maybe try the free demo if you're interested.

For a full review of Wetwork you can check out the video I made on it here:

[. This is a Pac-Man type maze game with randomly generated dungeons. This interesting game has a lot of gamemodes to choose from. the first few gamemodes are not really that great because it doesn't give the player anything to do. Its just run and grab a key to get to the next easy level ... thats it you just keep repeating this over and over again. You would think that as you go further into the game it gets harder as you go. well it's surprisingly easy because most of the time the exit is rendered literally right next to where you spawned with the key right next to it. The game seemed hopeless but there was one saving grace that actually made this game truly enjoyable. The Adventure Mix mode makes you utilize all of its items and gives the player something to do. This mode gives you interesting tasks to do in the dungeon itself. Weather it be killing 5 skeletons or collecting gems through out the dungeon. This mode truly saves the game for being boring and it keeps it fun and refreshing.](#)

[If you are interested in this game be sure that the first few gamemodes are pretty crappy but there is one gamemode that makes this game worth the \\$2. the worst game ever. Honestly, this is not good VR. It's not a fun game either. It's very pretty to look at but it's completely uninspired and unoriginal. Devs are still working out what makes a good VR game and this is a decent attempt but a failure in my opinion. Spinning around tilting your head while going really fast is going to make you sick too.. It's not our traditional Worms, but it's still fun.. Alot of people criticise the alien games. But as I'm a huge fan of the series. I can say i enjoyed playing it. It's not a terrible game at all.. This game has an incredibly steep learning curve which is more like a cliff and so most people dont get further than playing against a cheating AI for the most part. However, I can say with certainty this is possibly one of the best Tactical RTS games I have ever played. The online community is helpful beyond belief and the feel of a 10v10 when you have a checkpoint charlie stand off with the enemies tank is incredibly fun to watch. Not only that, but the addition of Jets and bombers and the balance of infantry and their variety keeps this game very interesting to watch.. Had fun would play again](#)

Good Game worth having in your inventory. This is a beautiful, peaceful lazy-day simulator. You can watch the day and the seasons go by.

Pros: you can go for a nice walk when there's too much weather to go outside in the real world.

Cons: I accidentally kicked my bike over a mountain and couldn't get it back.. Developer is pure ♥♥♥♥♥♥♥♥♥♥. I wrote a post on his news that I misinterpreted title and he banned me.

Also made game that is 15 mins long and did 1% sale..

Basing on memes, which are just stupid, cause it's something for most people and most people on earth are stupid, this game is also stupid (it's my opinion!)

Developer banning me used comment "Your are stupid!" which proves his not brightest mind... at least at languages.

Dev, feel free to mark this review as 'harmful' for you.. A good shooter with a zombie. There is a view from the third person and from the first. Different abilities and large locations. If you want to pass the evening, then what you need.. this game is very fun! just turn down the quality but still its great. Nominated, played & reviewed this game in steam autumn sale 2016. xD. Very good game .very differnt style off racing,nice sim of off roading,multiplayer seems not to work but couldd just be me .TBH not worth the price on steam but a great game if you can get for £5 or in a bundle. IMO 7/10. I got this game for free, from a giveaway from [grabthegames.com](http://grabthegames.com)

At first, this game looked very ♥♥♥♥♥♥ and not very fun.

After some playing I think it's a pretty fun game. The graphics are awful, and there are no walking animations for example. You can hear other people using their knife from over 20 meters, that's unrealistic af. But the game is pretty fun for just derping around with some friends. If you got this game for free, it's worth a try. If it's on sale, or if you buy it on♥♥♥♥♥♥for 20 cents, it's worth it too. But don't spend 2 dollars on this game.

11/10. Not worth it. I'm still figuring out how to use fireworks. It would not surprise me if i have to buy a DLC to use...\$\$\$ freaking game people now...If you're rich buy it.
